

Workshop #	PW200
Workshop Name	Water Small Systems
Summary	The workshop covers the responsibilities of the water operator, Public Water Supply Systems, the Environmental Protection Agency's rules and regulations, the disinfection of groundwater, the components, field disinfection, and operation of the distribution system. NOTE: This is a one-day workshop, so only gives 5 hours of KDHE credit.
KDHE/ABC Credits/Points	5 hours/0 points
Target Audience	Small systems operators, and those just starting out in the water field.

Workshop Description

The Small Water Systems workshop is designed to give the operator a better understanding of their small water system. Some of the topics covered in the workshop include: Public Water Supply Systems, Operator Responsibilities, EPA Regulations, Disinfection of Groundwater, Distribution Systems, and more.

The workshop is designed to give an overview of the things an operator of a small water system should know to perform their job. Successful completion of the Small Systems workshop will help the operator prepare for the Small Systems Examination given by KDHE.

Bring a pencil and/or pen and a calculator; we will be solving typical water math problems.

(Continued on page 2)

(Continued from page 1)

NOTE: Small Systems Certification requirements are not the same as Class I-IV Certification requirements. This class will meet these less-stringent requirements for Small Systems certification. This one-day class will give the Small Systems operator the required hours needed for certificate renewal, but if a Class I-IV operator takes this class, they will still need to gain more hours/points to meet the stricter requirements of their certification.

About The Instructor

Michael Ball has experience in working with water operators in over 140 Public Water Supply Systems in Kansas and has worked extensively in studying plant design and standard operating procedures.

How to register

1. Follow the link below to go to the Workshop page on the website, or use any app that can read QR codes and scan the QR code below.
 - Be sure to read all information—especially the information in **red**—before proceeding.
2. Click on the link of the appropriate Workshop Title. This takes you to the "At A Glance" page for your chosen workshop.
3. Next, double-check the information (like the workshop title, date and location of the workshop) to be sure you have chosen the correct one.
4. Then click on the appropriate link to register and pay
